Infosys Ltd. *Pune, India*

- Developed and maintained responsive web applications using React.js, Redux, and other modern front-end technologies.
- Reduced load time by 50% percent by replacing old web application with Single Page Application build using ReactJS.
- Worked in an Agile development environment, participating in daily stand-ups, sprint planning, and code reviews.
- Collaborated with designers and back-end developers to implement user interface designs and integrate front-end components with back-end APIs.
- Ensuring compatibility of web applications across different browsers and optimizing performance for a wide range of user environments.

PROJECTS

Gym Website designed and developed web platform for a commercial gym. This website serves as an online presence for the gym, providing information about its facilities, services, and membership options. It was built using HTML, CSS, JavaScript, and the Bootstrap framework to ensure a responsive and visually appealing user experience.

Wanderlust is a Travel package booking application developed using MERN Stack (MongoDB, Express.js, React.js, Node.js)

Project Management App developed with the MERN stack and GraphQL, enabling efficient organization and management of project data and client information. Users can add, update, and delete project and client data, create new projects with relevant details, and manage client information, including names, contact info, and project-specific data.
